

Queueing System Simulation

```
"/home/paul/Development/Fortran/Labs/MathModeling/Queueing System Simulation/cmake-build-debug/qss_ex3"
Simulation Stats
  Total servers:                4
  Total customers:              11000
  Total simulation time:        82779.7639098
  Average arrival time:         7.5207502
  Average service time:         16.9438908
  Average queue delay time:     0.4863204
  Average system time:          17.4302112
  Average queue length:         0.0276707
  Average customers in system:  2.2792210
  Server utilization:           2.2515503
  Refuse probability:           0.0000000
  Relative throughput:          1.0000000
  Absolute throughput:          7.5207502

Not Implemented.

Process finished with exit code 0
